Re: IT Programmer

Dear Sir/Madam

I am writing this application to apply for Senior Web Developer Position. I want to apply to work at your company because I have a lot of knowledge and experiences related to my major as Web programming which can be an asset to work in one of your team.

I already graduated at **Passerelles Numeriques Cambodia (PNC)** in November 2016. I studied several subjects such as HTML, CSS, Bootstrap, JavaScript, programming, Design (Photoshop), Database (MySQL, SQL Server), ASP.NET MVC5, PHP Framework, Java, Android, and CMS (WordPress) which are the basics of web programming. On the other hand, "Professional life" is a subject which taught me how to work in teams or to communicate well with others. Moreover, I have studied English every quarter to be able to speak and write well.

Until now, I have had internship twice. For the first internship is at **WorldBridgeE Commerce** company for four months, and the second is at **Nack Solution** company for six months. For these experiences, I have strengthened my ability more with my IT skill and soft skill. I worked with real project, solving problems, development and many things. For back-end, I developed on PHP, MySQL and JavaScript so on. For front-end, I developed on HTML, CSS, CSS3, Bootstrap, jQuery and JavaScript, and nowadays I work at **Greychain.net Co.,Ltd** company by developing on various websites and Systems.

I would be delighted if you could give me the opportunity to discuss with you. If you agree with my qualifications, you could reach me via: 0962711117 Email: Bunsin.toeng@gmail.com
Now I'm looking forward to hearing from you soon.

Thank you for your consideration and your time.

Sincerely Your

Toeng Bunsin
